ISSUE DATE: 22ND FEBRUARY 2010, ALMELO, NETHERLANDS

Group 2000 Netherlands BV opens a new US office in Wilmington USA

Due to the growing activities, Group 2000 has decided to open a new office for its operations in the Americas. With the opening of this establishment, Group 2000 is even better positioned to help and exceed its customer's expectations.

The Group 2000 US office is located in: 1209 Orange Street, Wilmington, Delaware 19801, which is in New Castle County.

About Group 2000

Group 2000 is a leading and innovative partner for **Network Forensics, Communication Services** and **ICT Services**. Our approach and solutions help Telecommunication Service Operators, Internet service providers, Governments, industries and Business Services to solve communication and security issues. Our Telco grade systems are in use all over the world and support our clients in over 20 countries.

Group 2000 was founded in 1978 and is privately held. From our Head Quarters in Almelo we organize our operations anywhere in the world. Group 2000 also has offices in Norway, Switzerland and in Echt (Limburg, Netherlands)

Group 2000 stands for openness, trustworthiness and transparency. We are the logical alternative. Based on our in depth knowledge of Telecommunication networks, communication protocols and network interfaces, we are capable, like no other, to help solve the challenges you face. A significant part of our time is spent on R&D and innovation in order to answer tomorrow's questions.

Our solutions are recognized as best in class by our clients, this also is expressed in performance evaluations. Based on your feedback we offer lasting innovation to improve your striking power. We are ISO certified and are a full member of ETSI.

Company Profile

Our organization consists of more than 60 professionals. The core of our organization is the highly skilled engineering team our focus is on Network Forensics, Communications Services and ICT Services. All disciplines are represented within our organization. Group 2000 works with a wide range of partners which enables to answer to all requests in our field.

Communication Services

With integration of technologies as its main characteristic the **SIMM** product line provides carrier grade communication solutions, ranging from IVR and Messaging to HD Video.

ICT Services

During our 30 years of existence we gained a lot of experience in system integration. We feel especially at home in demanding and critical environments.

Network Forensics

Based on an experience of over 15 years in the lawful interception industry, the **LIMA** product line provides solutions for intercepting, storing and optionally analyzing traffic in any kind of network.

Maintenance and Support

As important as the initial delivery of a system it self is the way it is supported thereafter. Our customer care department is well equipped to support our customers around the clock, 7 days a week.
